Name	ID	Role
Aritra Basak Joy	21-44986-2	Project Manager
Ashik Ibadullah	21-44976-2	Developer
A.S.M. Safatul Alam	21-44972-2	Developer
Lubna Yeasmin Urme	21-44930-2	Tester

Project management tool used: Trello

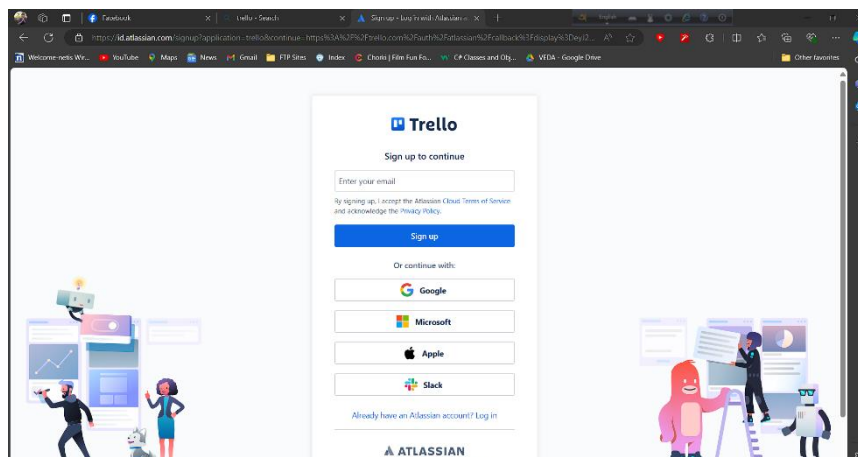

Getting Started:
Go to the browser, type Trello and enter in this link-

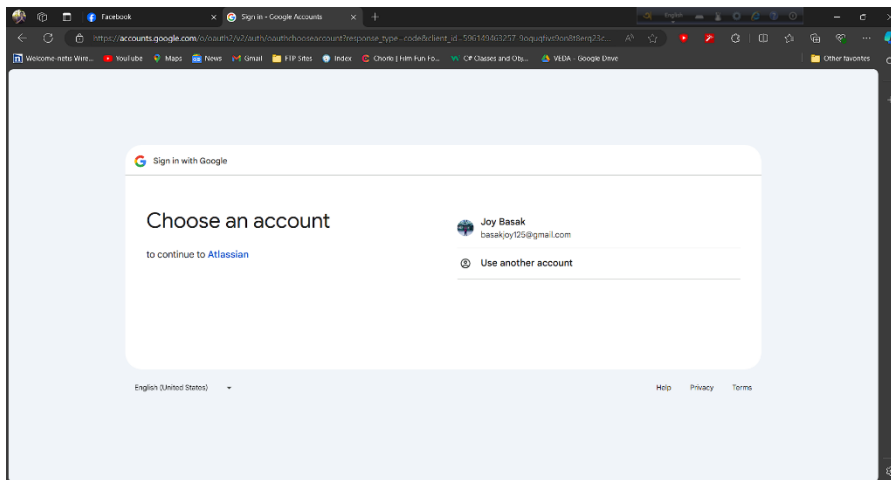

This is the Trello home page-

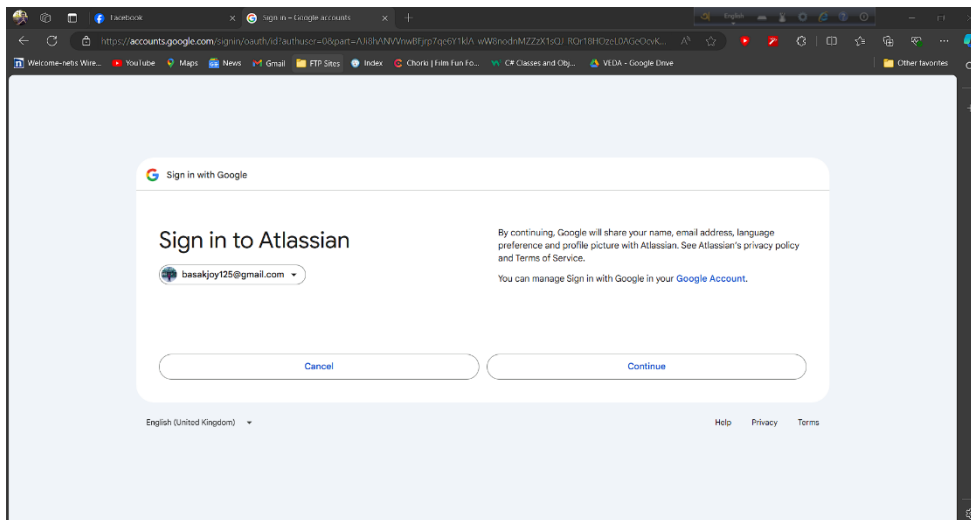

After clicking signup (Google) button you are forwarded to the sign-up page where you can enter your details or directly signup through email-

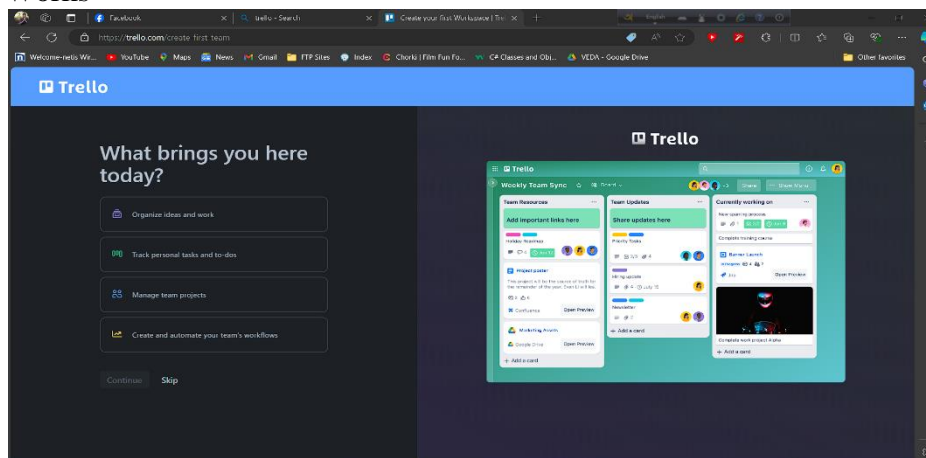

After choosing Google, choose your Google account-

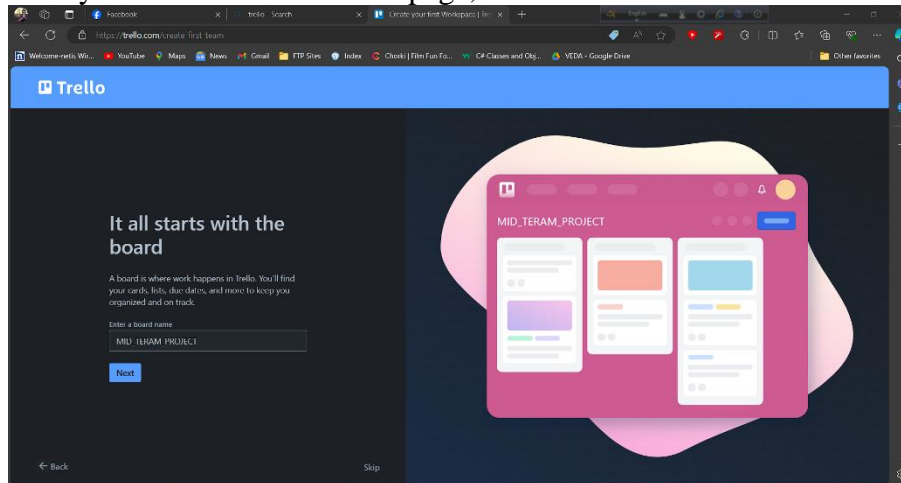

After choosing account, create “Trello” account by contiuneing this-

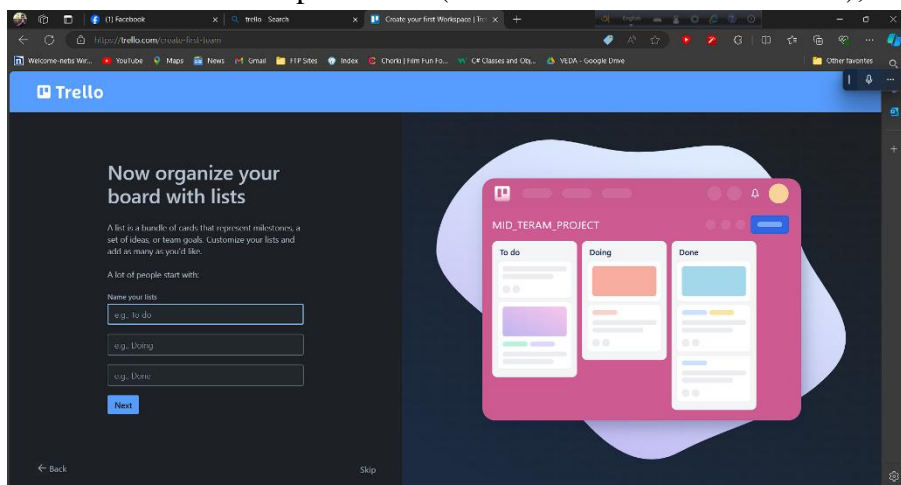

After choosing the email you are forwarded to this page and click “Organize Ideas and Works”-

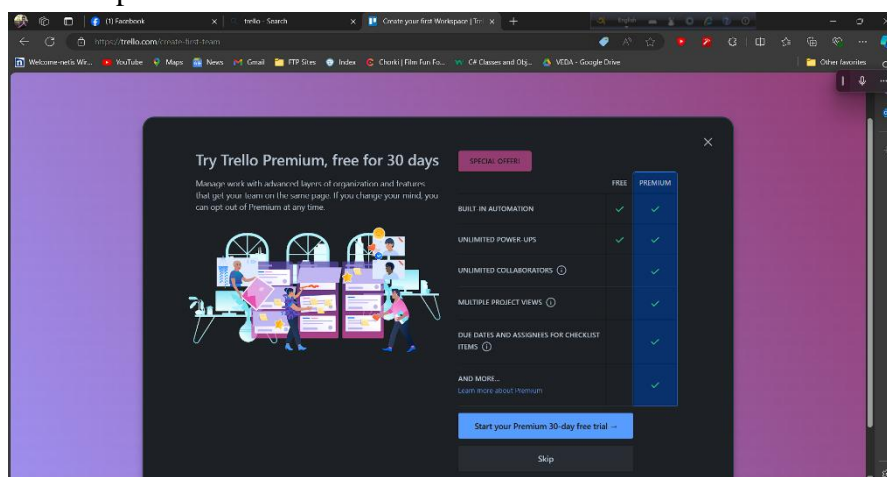

Then you are forwarded to this page, select a board name and click “Next”-

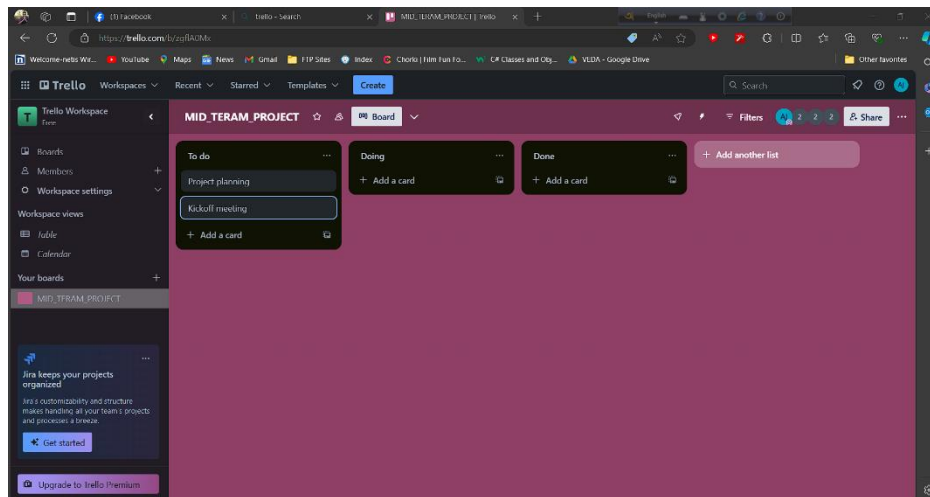

Now write down a couple of lists (a board consists of several lists), click “Next”-

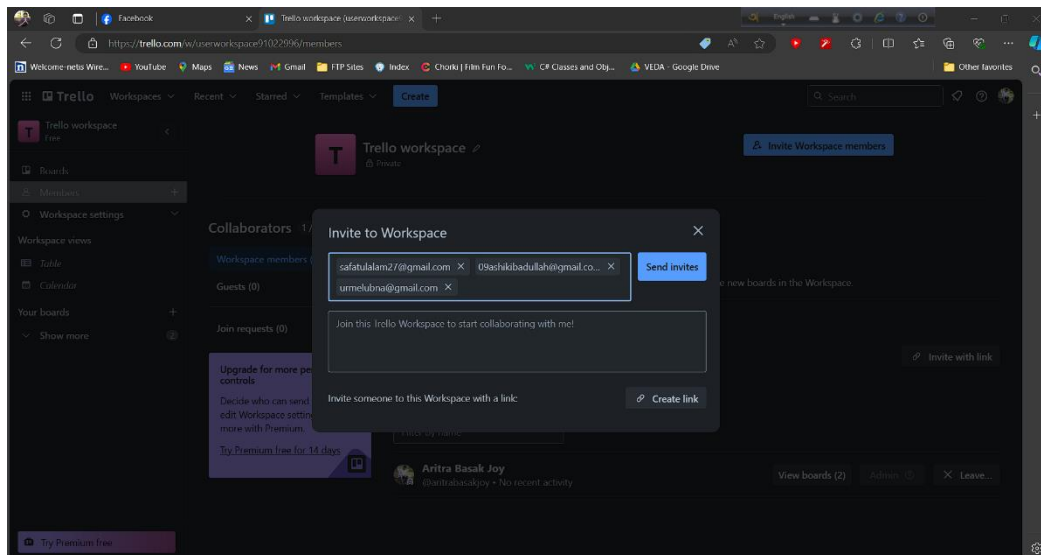

Choose plan-

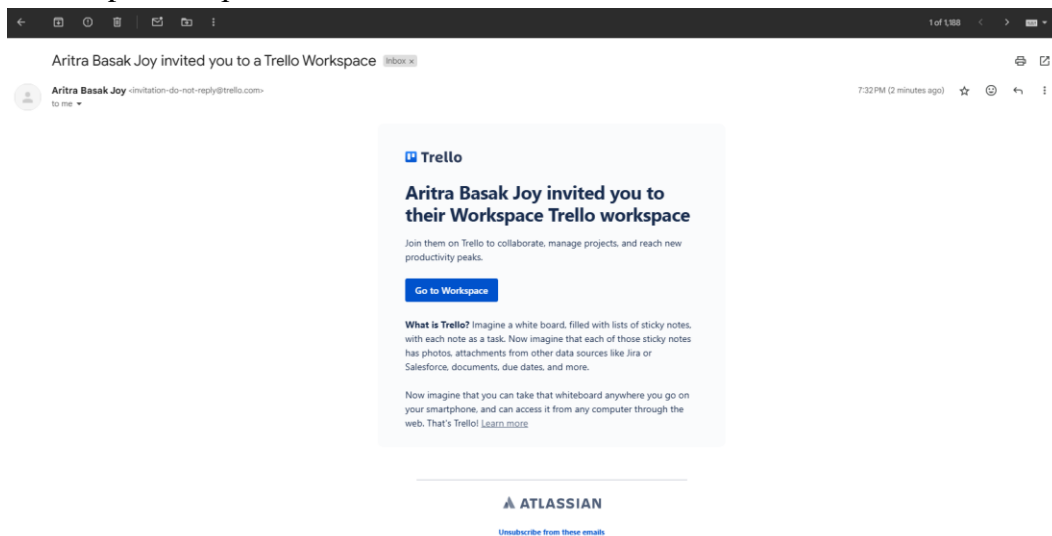

Then you are forwarded to workspace-

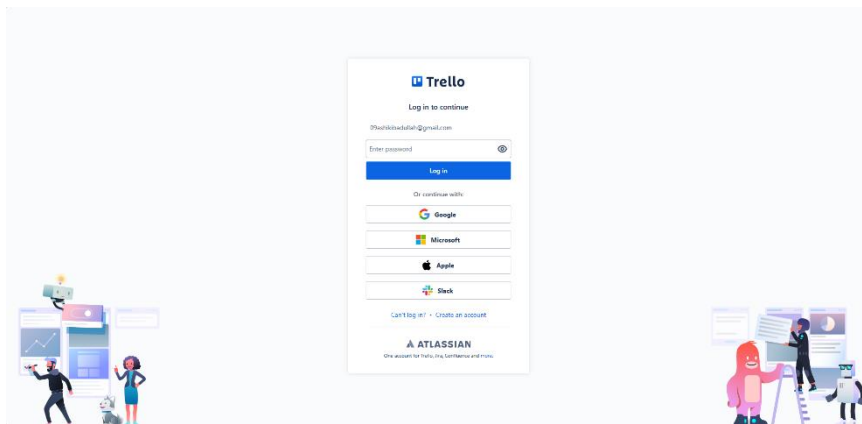

Now, send invitation through Gmail-

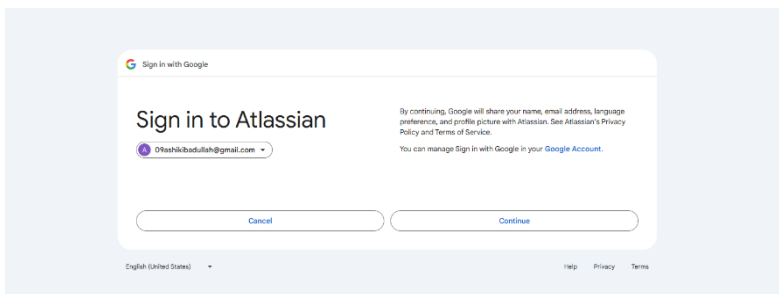

This is what your team members receive in their email he/she must click on “Go to Workspace” to proceed further-

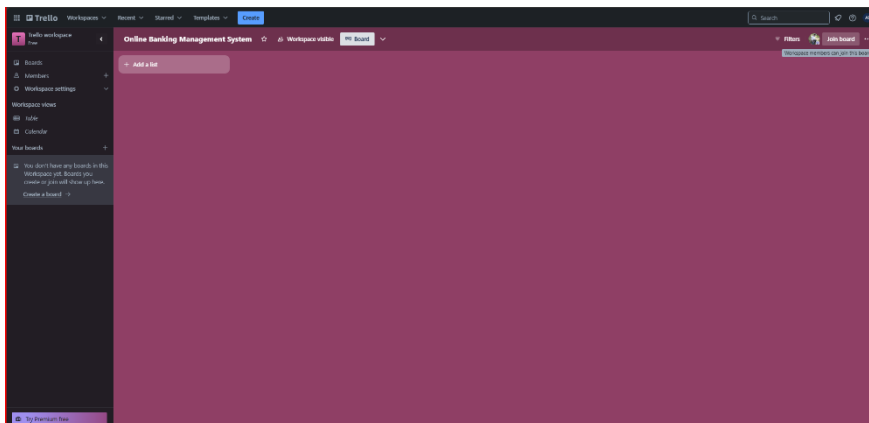

Then he/she can see this interface to create account with Google-

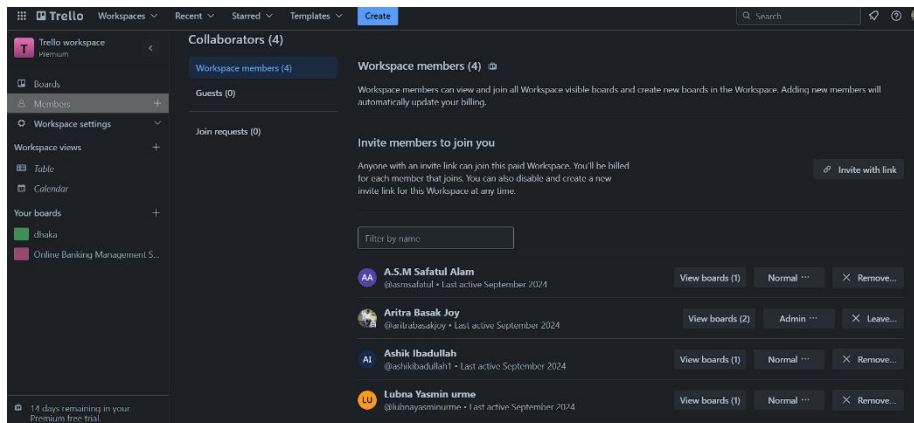

Then he/she can Sign in-

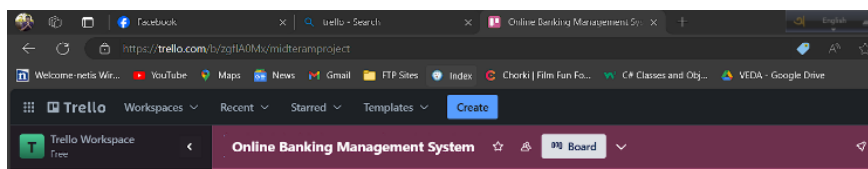

Then they can join the board by clicking “Join Board”-

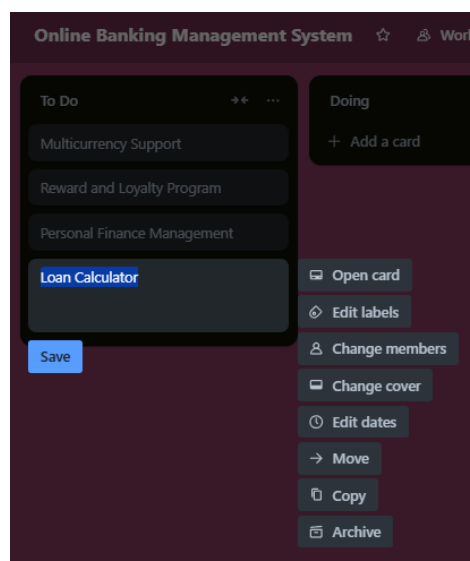

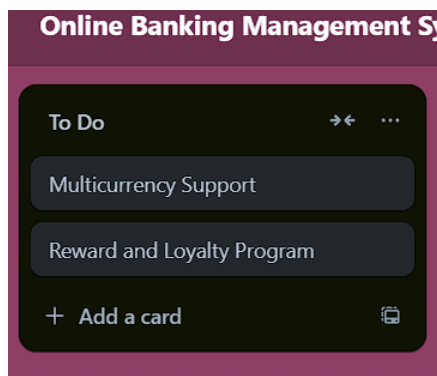

Other members join the board using the same process. This is the screen of a team member who can choose to leave by clicking on the “X leave” button on the bottom left side of the screen-

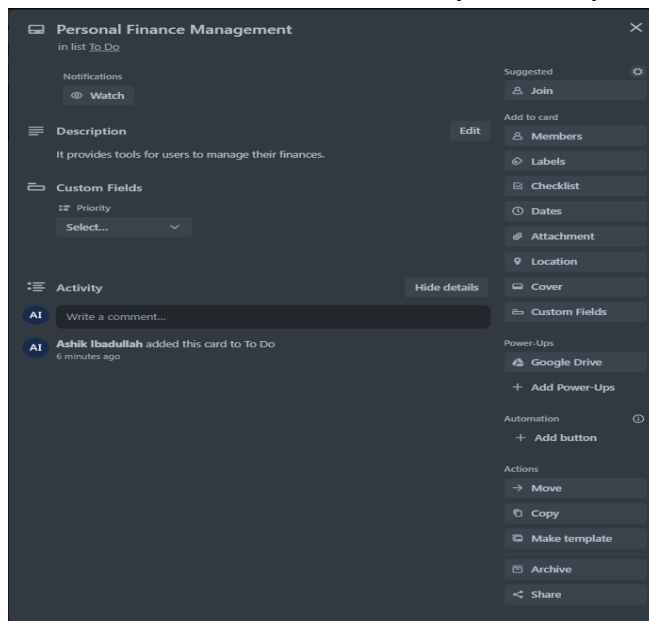

Now let’s rename our board name by clicking on it-

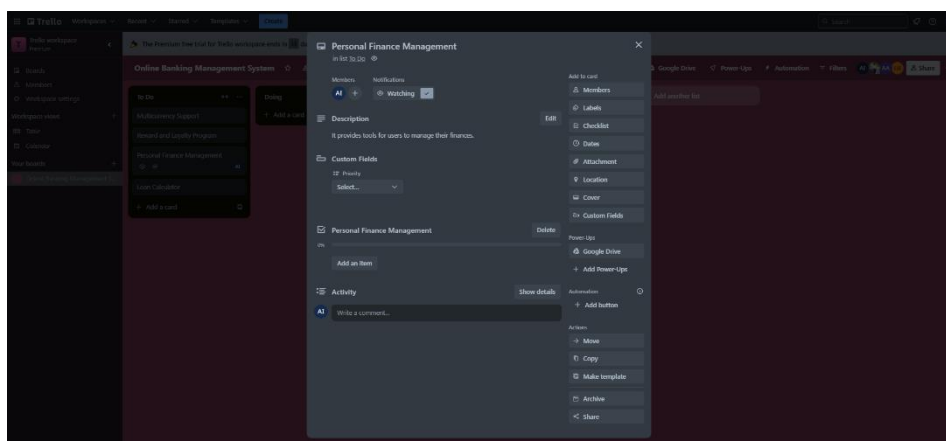

You can edit your card name and many other features by clicking on a pen icon which appears after you move the cursor on the intended list-

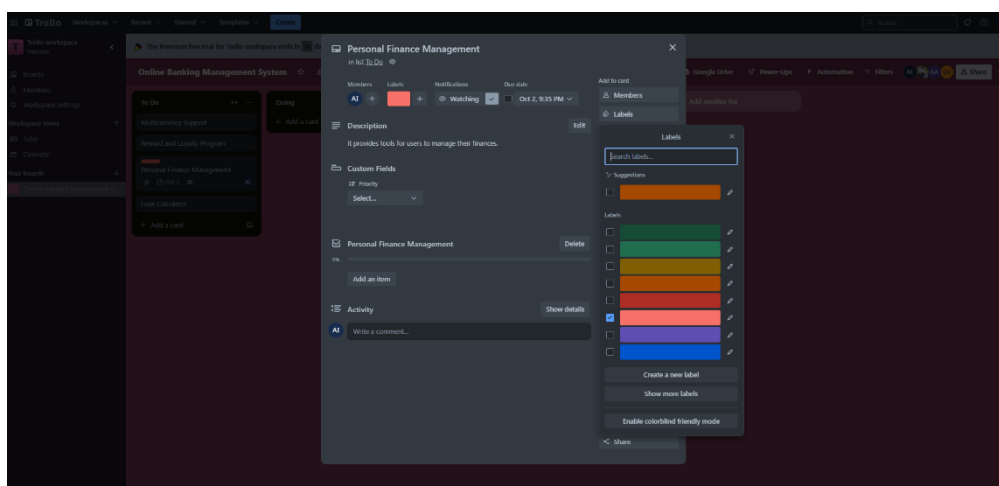

You can click on the list and directly edit everything in one place-

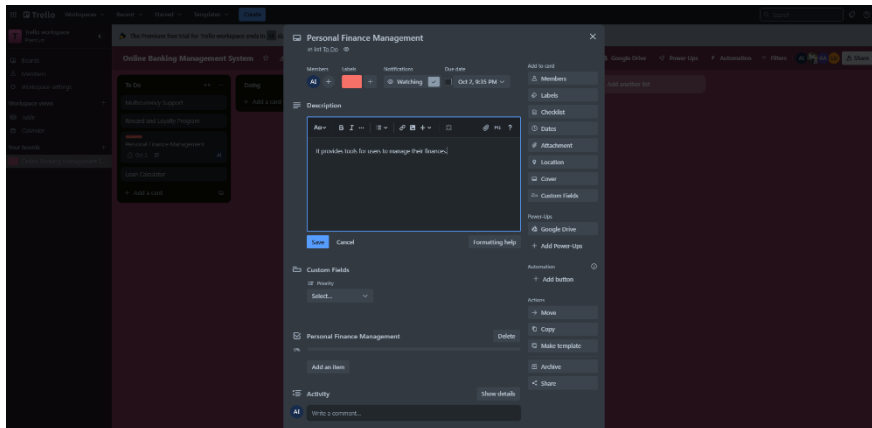

Firstly, assign team members to the list(requirement) by clicking on the “Members” button on the right side of the page and then clicking on their names-

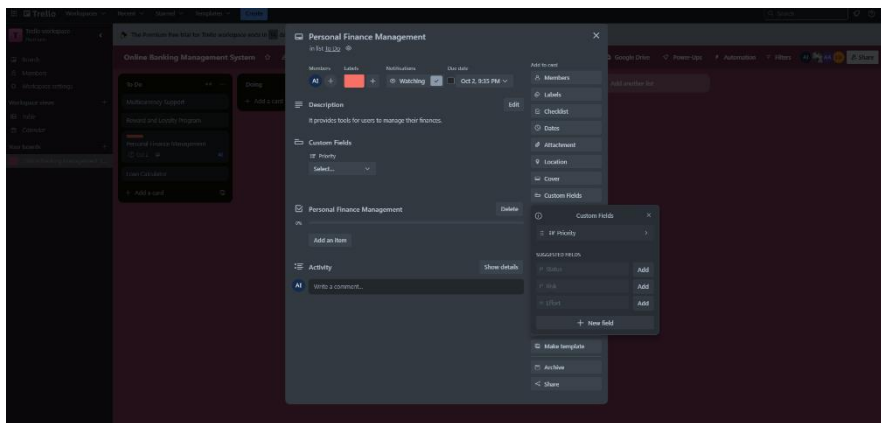

You can assign a colored label to this list by clicking on “Labels” and you can pick a color-

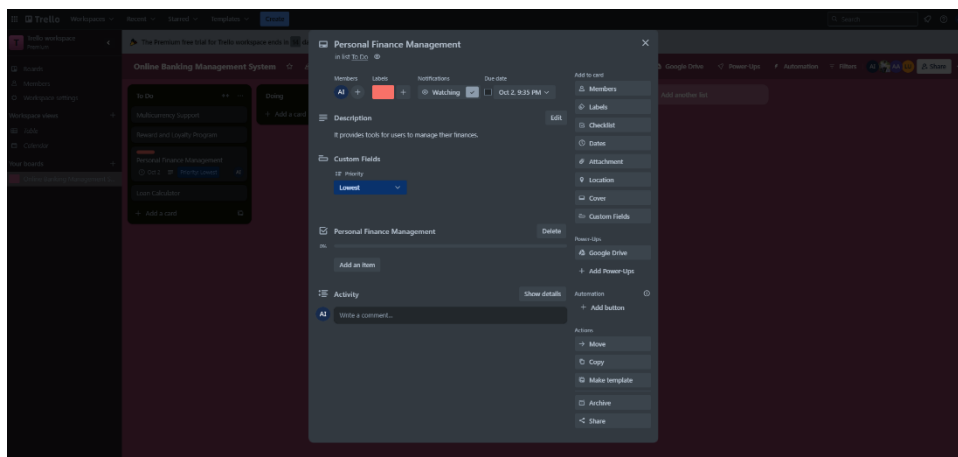

After that clicking on the description box and write down the description of this and then click “Save”-

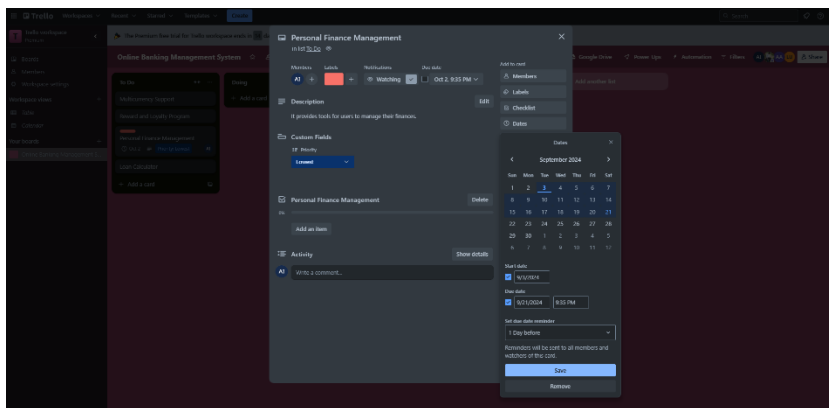

You can select priority from the Custom Fields-

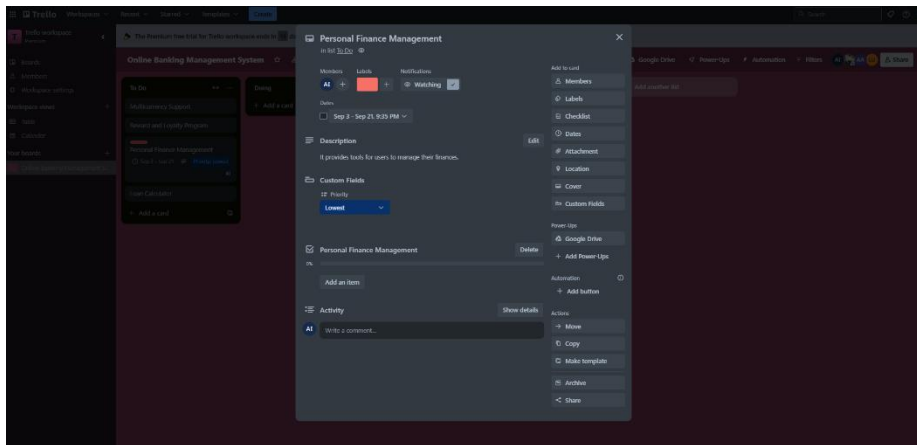

You can set priority-

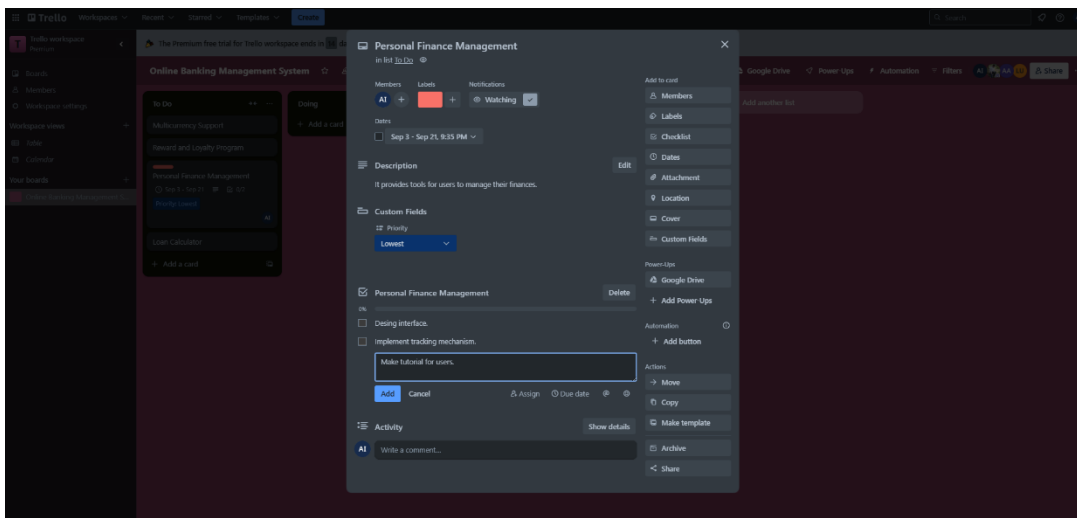

You can set the dateline and reminder from the Dates option-

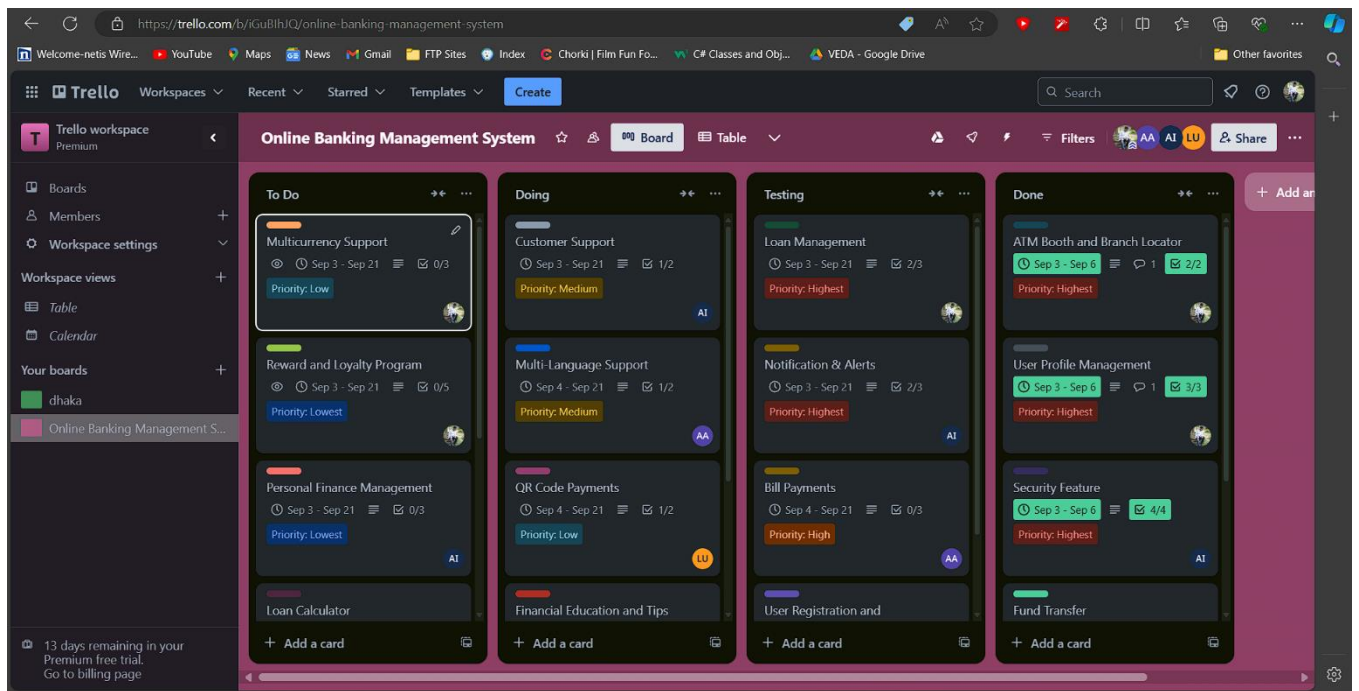

The due date is now visible the team member will click on it when he is entirely done with this requirement(list).Then the team member can click on show details in the activity box which will display all the activities conducted on the list till now-

Add the title of the checklist and then click “Add” to include it in the list-

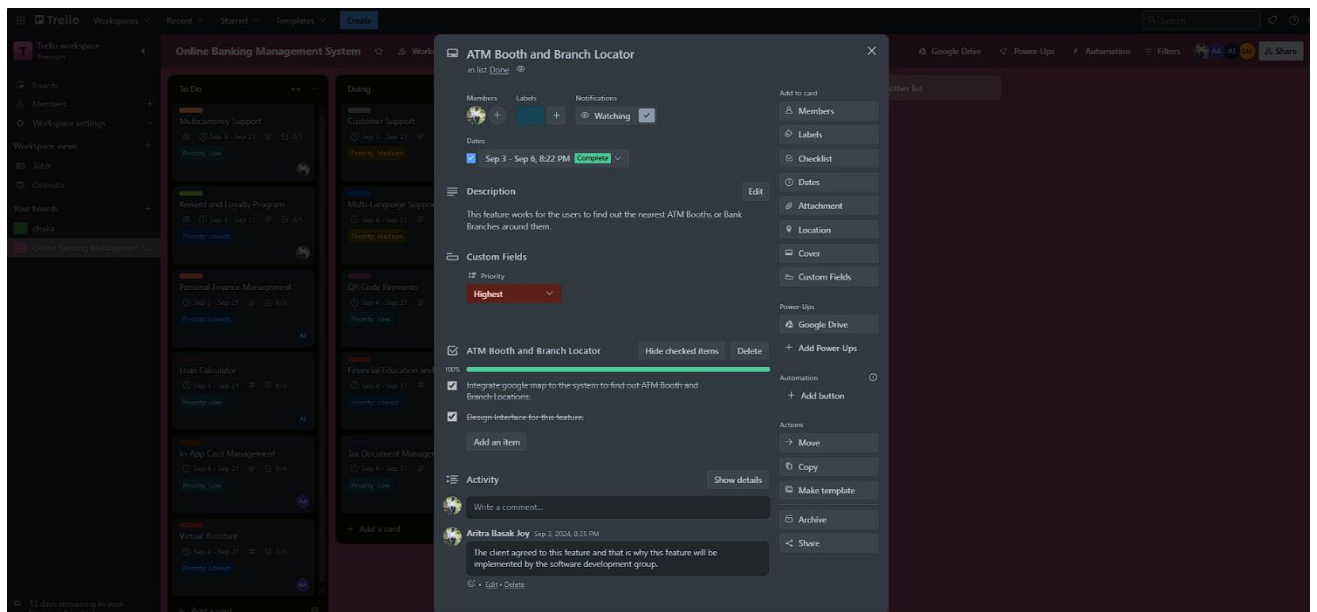

The dashboard will look like this after adding all requirements-

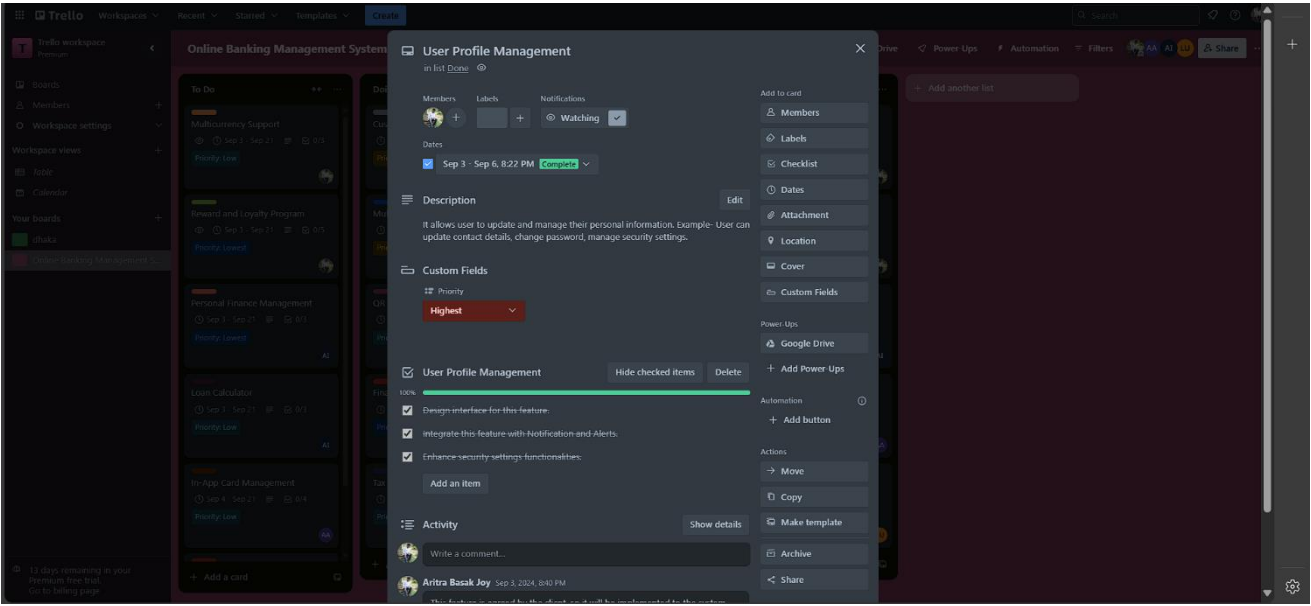

Aritra Basak Joy's 5 requirements and lists-

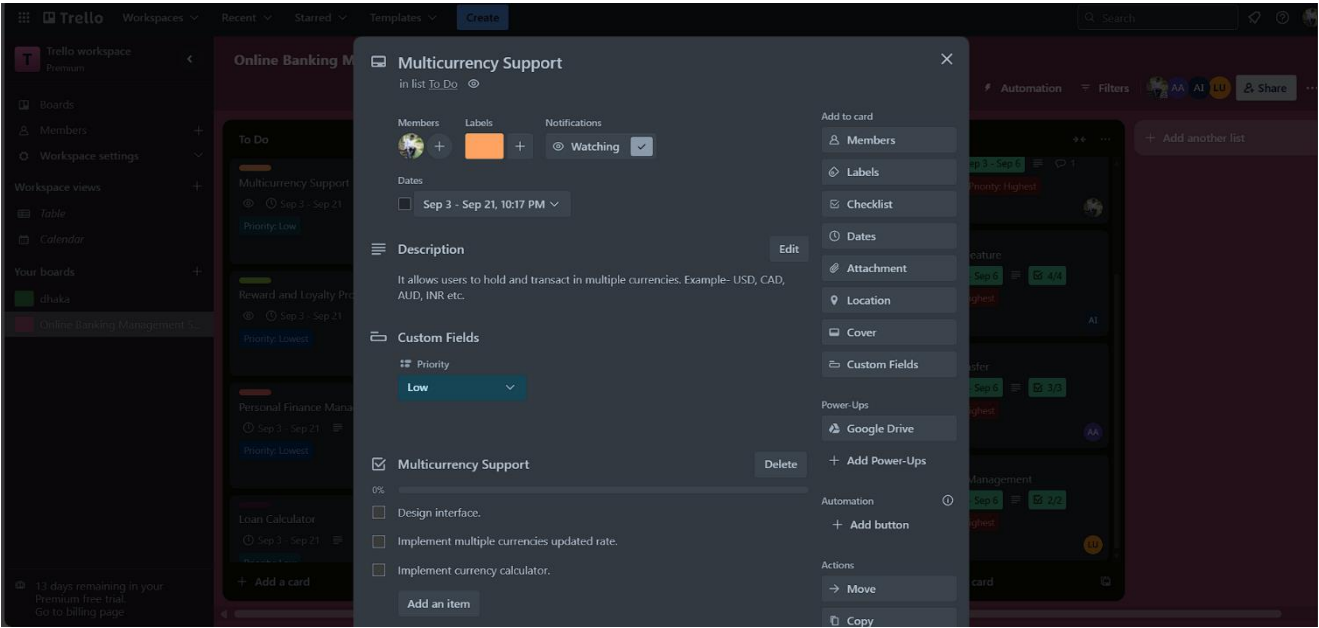

1. ATM Booth and Branch Locator-

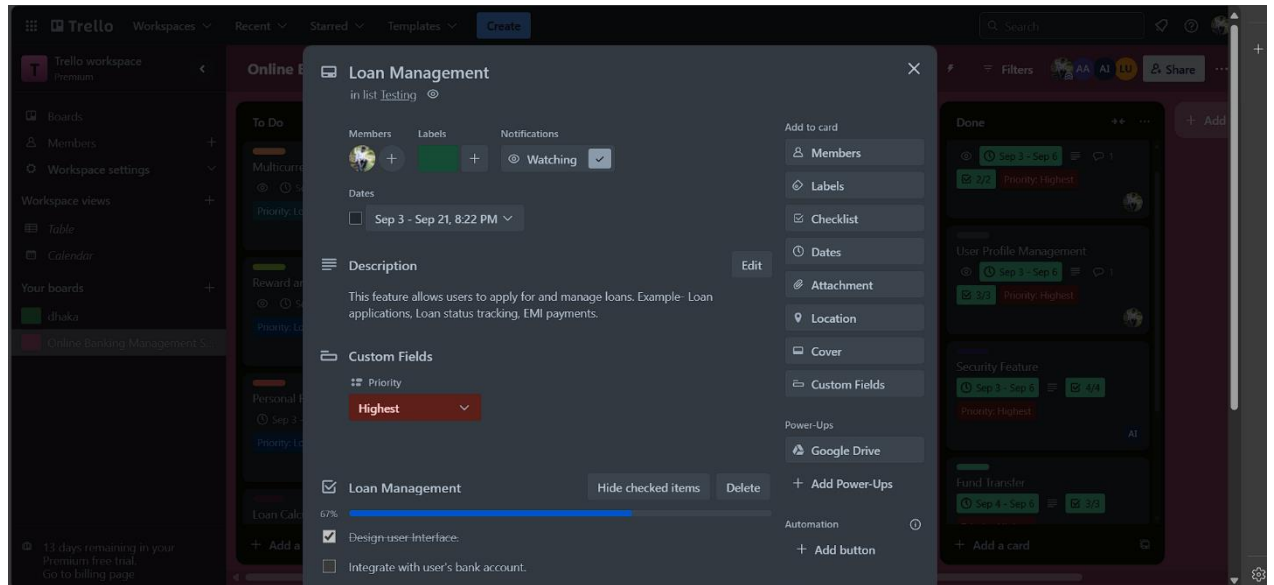

2. User Profile Management-

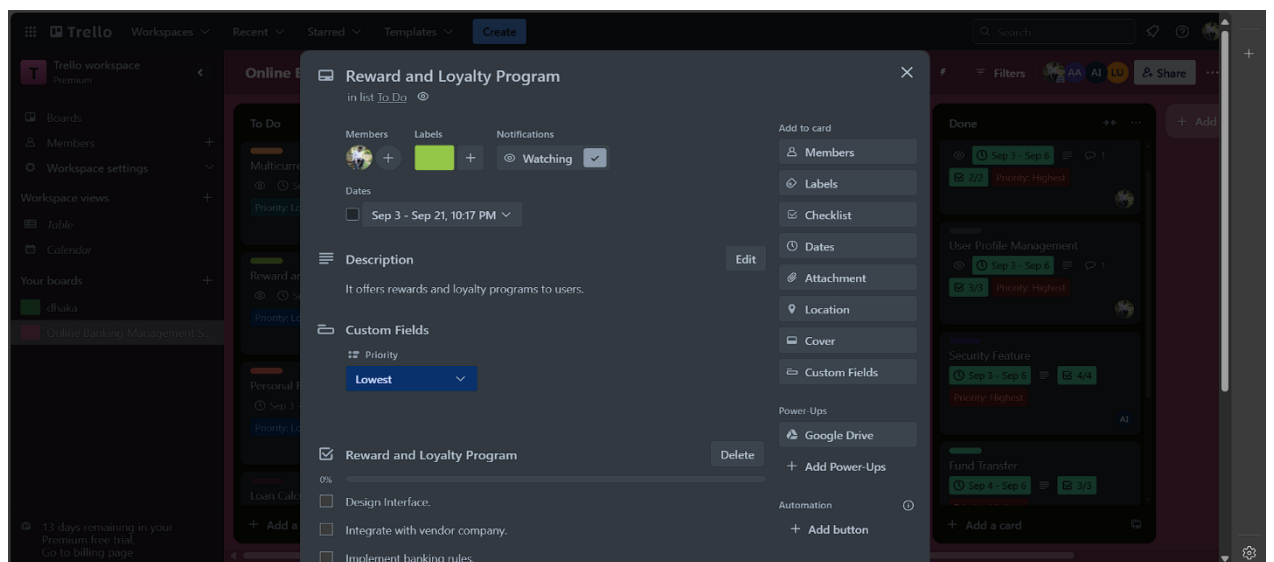

3. Multicurrency Support-

4. Loan Management-
